

# Artwork specifications for Sunscreen 7g Sachet Label

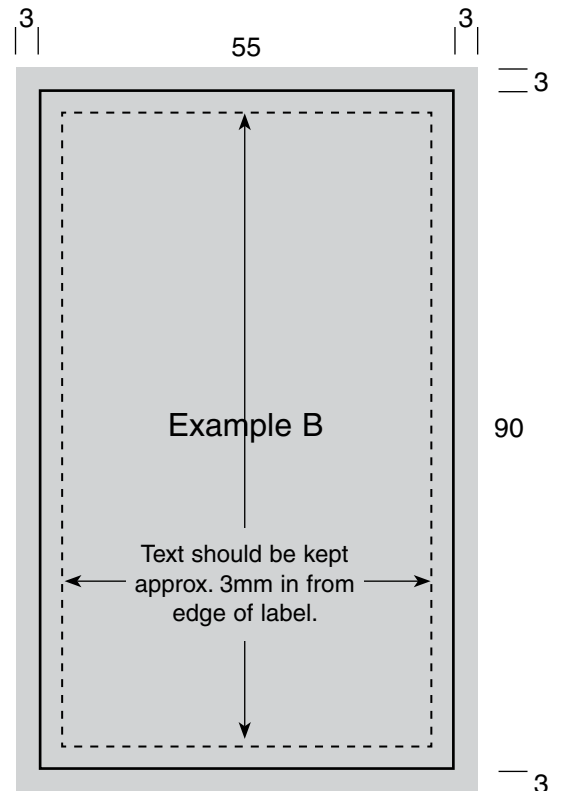

Label size: 90mm x 55mm

If you are setting up your own artwork the following is how it should be set up and supplied for us to impose for print production.

- Supply artwork file as press quality PDF.
- All images within the file should be at 300dpi.
- Convert all fonts to outlines.
- Please ensure that all trim marks, registration marks are on the file supplied. Add 3mm bleed if background extends to edge of label (Example B).
- **NO OTHER FORMAT IS ACCEPTABLE. IF NOT SUPPLIED IN THE CORRECT FORMAT, NO WORK CAN BE COMMENCED UNTIL SUPPLIED AS REQUESTED.**
- If printing in single or spot colours please indicate PMS colours used.
- If printing in 4 colour process, please ensure file is supplied in CMYK format.

If your label is a logo or lettering on a white background set up as Example A.

If your design has a background colour or graphic that extends to the edge of the label it will require a 3mm bleed around the label as in Example B.
